

Baby Clinic at School

School information pack

Introduction

Thank you for your interest in hosting a baby clinic at your school.

This information pack will contain all the information you will need to include a baby immunisation and wellness clinic as a value-added service to your clients.

Services

- Immunisation, private and governmental subsidised.
- Weighing, measurement and development milestone
- Professional advice health related matters
- Overall baby wellness check

Kiddies at Home model

Our model is developed to optimize parent's time, by bringing the baby immunisation and wellness clinic to a place they visit daily.

The clinic is operated by a Registered Nurse and is conducted on a as needed basis an hour before your school starts.

Clinics will be arranged depending on demand and arrangements will be made with parents indicating that they want to make use of this service. This will be done at no cost to the school.

What you need to do

All our services are rendered on a voluntary consent basis between the parent/legal guardian and Kiddies at Home (Pty) Ltd. This means that the school has no obligation towards either party.

All that we need from the school is to tell us about your school and we will send marketing material that you can distribute to your parents which explain all our services and processes.

We also need the use of a private room such as a classroom or office, for which we will pay 10% rental on consultation fees. This will be paid at the end of each school term after receipt of an invoice.
